OBJECTIVE

I am seeking a position in a company where I can take a challenging role as a Front End Web Developer in a highly technical company where I can utilise my skills.

CORE-SKILLS

Expertise: Html5, Css3, Bootstrap, Tailwind, DaisyUI, JavaScript, React.js, Firebase.

Comfortable: Express.js, Node.js, and MongoDB.

Familiar: With typescript and Material-UI.

Tools: Git, VSCode, Netlify, Discord, GitHub, Figma, NPM, and Vercel.

PROJECTS

Trusted Furniture()([Live-link](#) | [Client-code](#) | [Server-code](#))

Technologies: React.js, Tailwind, Daisyui, Node.js, Express.js, MongoDB, firebase, stripe ,moment.js etc.

- It is a used product resale project with Navbar, Banner, categories, advertise, review section and footer.
- I applied login, register with firebase authentication, JWT token for security, admin verification etc.
- Admin will see all sellers and all buyers, Buyer will see orders, and wishlist, Seller will see his products, and sellers can add products.

Shathy's Kitchen ([Live-link](#) | [Client-code](#)| [Server-code](#)**)**

Technologies: React.js, Tailwind, Node. js, MongoDB, firebase, React-photo-view, React-router-dom etc.

- This site is a service review project. Sites with private routes, login, register, navbar, error page, and footer.
- On the home page, there are 4 sections, a banner,shathy's kitchen information, contact, and food services.
- I added firebase authentication & JWT tokens. My review routes will show the current user review.

Smart Education([Live-link](#) | [Client-code](#) | [Server-code](#))

Technologies: React.js, Tailwind,Node.js, Express.js, React-to-pdf, React-hot-toast,MongoDB, Firebase etc.

- On the site's homepage, Courses page, details page, Private page, Blog page, Faq page, error page etc.
- User information is shown in Navbar. On courses, there are 2 parts. one is a sidebar another is 6 cards.
- There is a private page. Nobody is allowed without login. There is a checkout page for premium access.
